## SUMMARY

---

Passionate UI/UX Designer & Frontend Developer with 6+ years of experience crafting user-centric interfaces and applications in diverse platforms. Skilled in leading design teams, building scalable design systems, and delivering high-quality front-end solutions. With a focus on creating seamless user interfaces, I transform ideas into reality with precision and creativity.

## WORK EXPERIENCE

---

### (Ensue Nepal)

May 2018 - Present

*UI/UX Designer & Frontend Developer*

*Lalitpur, Nepal*

- Led design and development of LearnYourBenefits: Conceptualized, designed (Figma), and developed the application, resulting in increased user engagement by approximately 25%. Established and maintained a comprehensive design system, streamlining design and development processes
- Led design and development for EarthScout: Designed web and mobile (iOS/Android) applications, ensuring a cohesive user experience. Created and managed a scalable design system for both platforms. Led development and maintenance of the web application
- Pioneered in-house design system: Developed a custom Figma-based design system, improving design efficiency and consistency across projects by 15%. Built reusable components to expedite development and enhance UI quality.

### (ITGlance)

Aug 2016 - May 2018

*Frontend Developer*

*Kathmandu, Nepal*

- Designed and developed websites for both internal projects and clients, enhancing user experience and increasing client satisfaction
- Oversaw the design process, resolved design issues through root cause analysis, and performed cleanups, leading to more efficient project workflows

## PROJECTS

---

### LearnYour Benefits

Sep 2018

- Led the entire visual design process for the web application, from concept to completion.
- Created wireframes, mockups, and prototypes to effectively communicate design concepts and user flows.
- Developed and implemented front-end code to bring designs to life and ensure optimal user experiences.
- Designed and built multiple custom themes and templates to meet diverse client requirements.

### Industrial Smart - EarthScout

Sep 2020

- Lead the design vision and flow for both native ios/android application and web application with consistent design pattern and user flows.
- Provided design guidance and support to cross-functional teams to maintain design quality and consistency.
- Designed user flows for various features and interaction between IOT device with our application.
- Built robust and scalable web applications using Angular, developing reusable components for efficient development.

### GE Health Care : Mission Control

Mar 2021

- Created design mockups and prototypes to visualize client requirements and ensure seamless user flows.
- Built reusable components and other core functionalities, improving development speed and UI consistency.
- Developed custom Angular service for efficient form management based on external configuration data, enhancing development efficiency.

### Industrial Smart - Soil Cub

Feb 2023 - May 2024

- Led the design vision and strategy for both iOS and Android mobile applications.
- Created comprehensive design mockups and prototypes to define user flows and interactions.
- Ensured design consistency across both platforms, maintaining a cohesive user experience.

### SCP - Healthcare

Jan 2022 - Jun 2022

- Created detailed design mockups and interactive prototypes to visualize user flows and interactions.
- Developed the front-end application's visual identity using styled components to ensure a consistent look and feel.
- Managed the design system for the application, maintaining component styles and visual consistency.

### HR Application

Jan 2023

- Led the design and development team to deliver a successful web application.
- Established and maintained design consistency across the entire application.
- Developed core front-end components and features to drive project progress.

## **EDUCATION**

---

**National College Of Computer Studies**

*Bachelors in Information Management*

**Aug 2012 - May 2016**

*Kathmandu, Nepal*

---

## **CERTIFICATIONS**

---

- **Google UX Design:** Google UX Design by Google on Coursera. Certificate earned at August 20, 2023

## **SKILLS**

---

- Front-end Development, Angular, Figma, Product Design, UI Design, UX Design, Web Development, Next.js, React, TypeScript, JavaScript
